

Aim to build Yield Potential with Lower Volatility

HDFC Income Plus Arbitrage Omni FOF

NFO Period: 27th Feb to 11th Mar 2026

HDFC Income Plus Arbitrage Omni FOF

Dynamic Allocation across Debt-oriented Schemes and Arbitrage Scheme

HDFC Income Plus Arbitrage Omni FOF = Active Debt-oriented Schemes + Passive Debt-oriented Schemes + Arbitrage Scheme(s)

Active Debt-oriented Schemes	Passive Debt-oriented Schemes	Arbitrage Scheme(s)
<ul style="list-style-type: none"> Allocation* to Active debt-oriented schemes in a dynamic manner Scheme will actively manage allocation by adjusting the portfolio duration and credit risk based on the interest rate outlook, decisions made during RBI monetary policy, shape of the yield curve, and other factors as deemed suitable by the Fund Manager Aims to invest in active debt mutual fund schemes, which predominantly invest in non-AAA securities 	<ul style="list-style-type: none"> Allocation* to Passive debt-oriented schemes Wide Product Range spanning across different maturity segments at HDFC Mutual Fund: 9 Debt Index Funds and 1 Debt ETF 	<p>At least 35% of the portfolio allocated to Arbitrage Fund</p>
<p>*Exposure to units of Debt Mutual Fund Schemes, Debt Securities and Money Market Instruments[®] shall be below 65%</p>		

[®]Investments will be made Cash or cash equivalents i.e. Government Securities, T-Bills and Repo on Government Securities, units of Liquid and Overnight Mutual Fund Schemes for liquidity purposes. For complete disclosure on the Asset Allocation of the FOF, please refer to slide 20 titled "Asset Allocation" or refer to the SID at www.hdfcfund.com

Who should invest in HDFC Income Plus Arbitrage Omni FOF?

*Please refer to slide 6 for a more detailed understanding on taxation of HDFC Income Plus Arbitrage Omni FOF

Why invest in HDFC Income Plus Arbitrage Omni FOF?

Particulars	Debt Mutual Fund Schemes	HDFC Income Plus Arbitrage Omni FOF
Dynamism in Asset Allocation	Investments are made in debt schemes based on the categorization / investment objective	Invests dynamically in units of Arbitrage Scheme and Active / Passive Debt-oriented Schemes after evaluating various parameters like arbitrage spreads between the cash market and Future & Options market, credit risk, interest rate risk, RBI monetary policy outlook, shape of the yield curve, liquidity risk, and others as found suitable by the Fund Manager
Decision of switching between the Schemes	Decision lies on the Investor	Decision is taken by an experienced Fund Manager
Taxation on Switching between Schemes	Changes in interest rate outlook, inflation pattern, economic environment and other factors could lead to incurrance of taxation on switching between schemes	No taxation incurred when switching between schemes
Taxation of Capital Gains	Investor's Income Tax Slab Rate irrespective of any holding period	12.5% [^] tax rate for holding period exceeding 24 months → Makes HDFC Income Plus Arbitrage Omni FOF more tax-efficient

[^]Surcharge as applicable + Health and Education Cess applicable at 4% on aggregate of base tax + surcharge. Investors are requested to take professional advice while making investment decisions.

Credit Philosophy of HDFC Mutual Fund

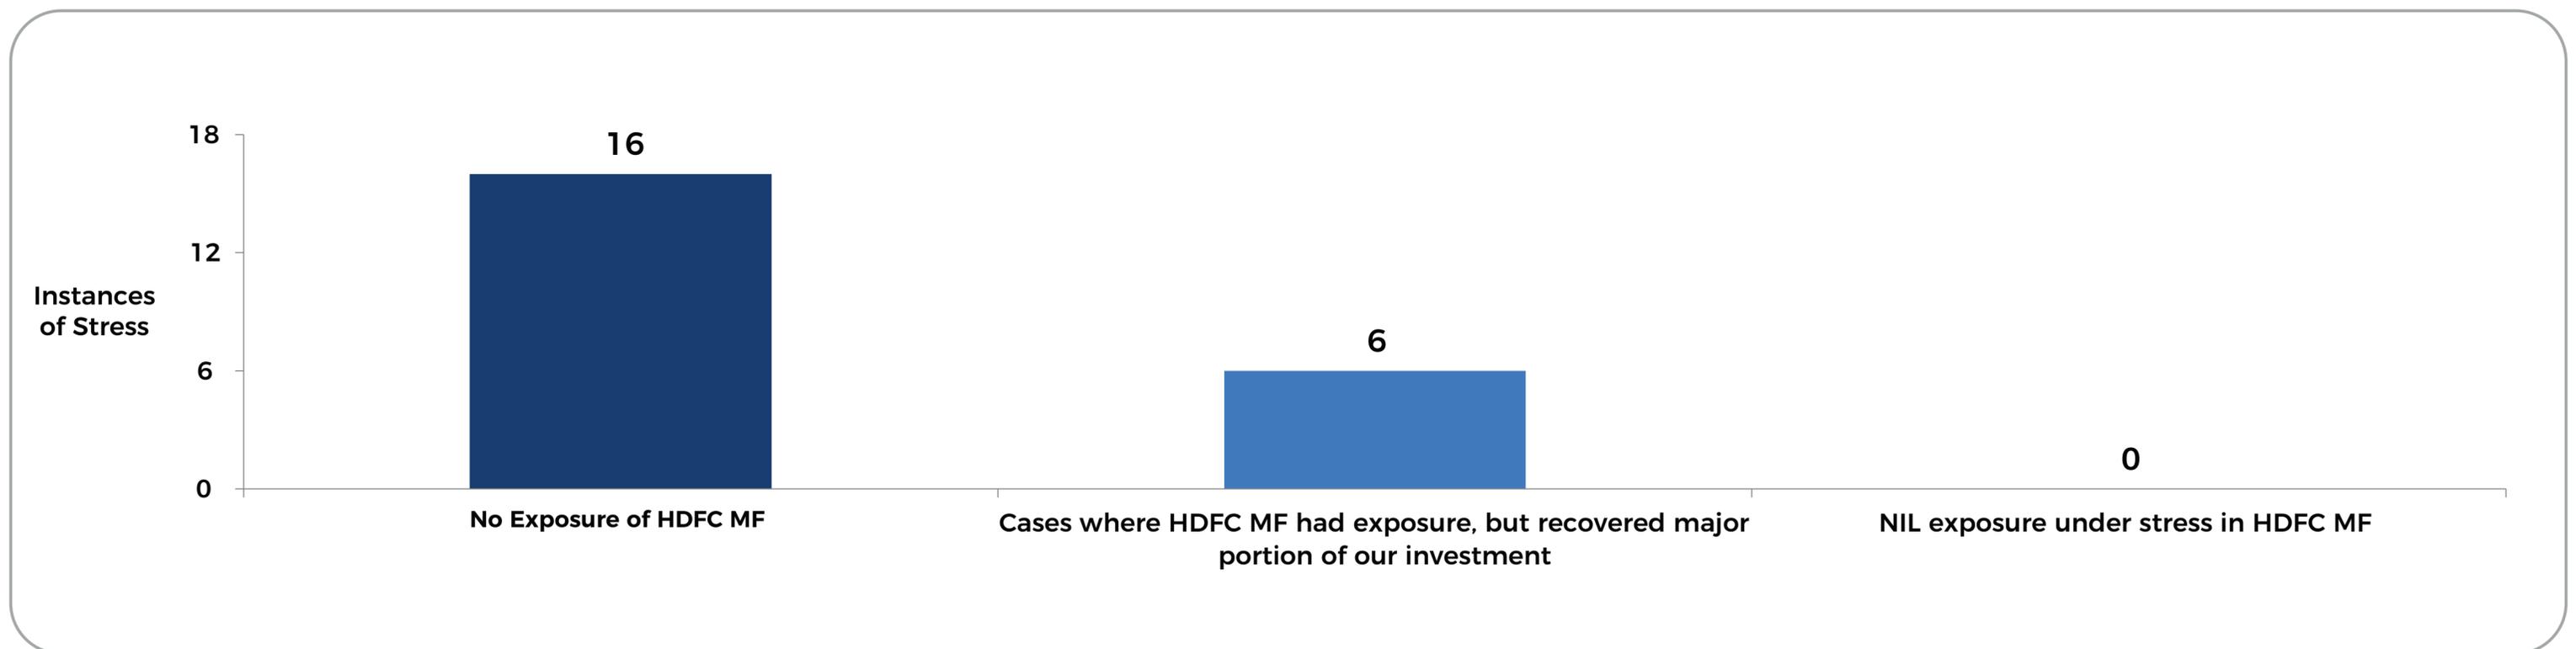

Independent credit evaluation based on multiple factors

Proprietary Credit Score Model based sizing of exposure and resultant diversification aims to add another layer of protection

Results of a Disciplined Credit Process

In our opinion, MF Industry has experienced instances of credit stress* in nearly 22 Companies / Groups

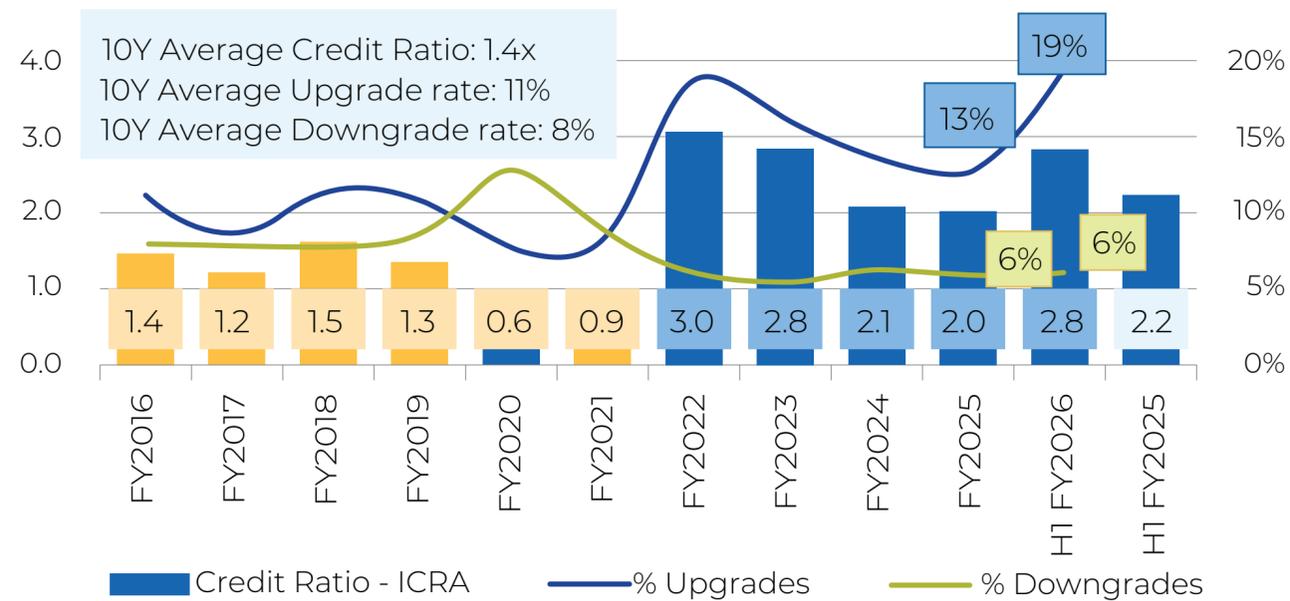

*Stress is defined as companies whose ratings were eventually downgraded to BBB or below rating category during last ~15 years (2012 to 2026).

Refer disclaimer on page 26

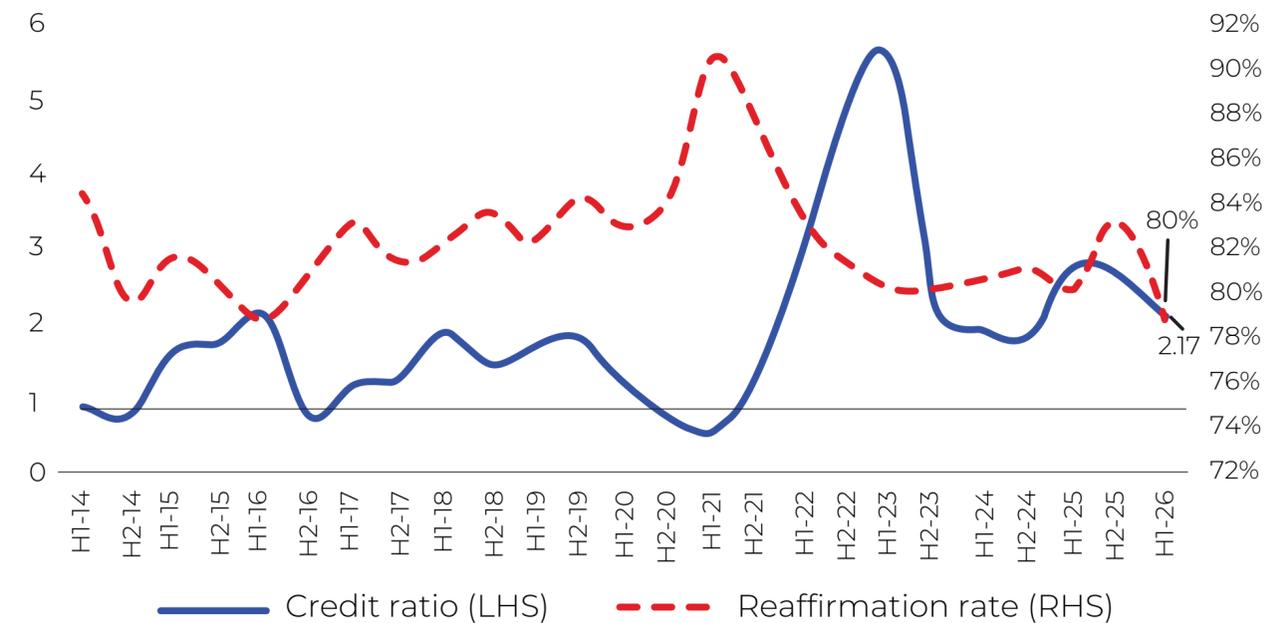

Current Credit Environment

Trend in Credit Ratio and Rating Movement

- Credit Ratio of ICRA-assigned ratings remained healthy at 2.8x in H1FY2026
- Most rating upgrades continue to be driven by entity-specific factors such as improvements in the entity's business profile, strengthening of the parent's credit position, and reduced project risk

Trend in Credit Ratio and Reaffirmation Rate

- Credit Ratio reported by Crisil stands at 2.17 times for H1FY26, moderating from 2.75 times reported in H1FY25: There were overall 499 upgrades and 230 downgrades during the period
- The Reaffirmation Rate stood at ~80% for H1FY26, underscoring the resilience of the corporates

Source: Performance of ICRA-assigned Ratings (H1FY2026), Crisil Ratings Round-Up: H1FY2026 | Strides of Resilience. Credit Ratio: Defined as the ratio of the number of entities upgraded to that downgraded during a defined period (excludes downgrades because of the entities' non-cooperation with ICRA). The upgrade /downgrade rate for H1FY2026 is annualized. Reaffirmation Rate: Percentage of credit ratings that remain unchanged (affirmed) by credit rating agencies over a specific period, typically indicating stability in corporate credit profiles.

Refer disclaimer on page 26

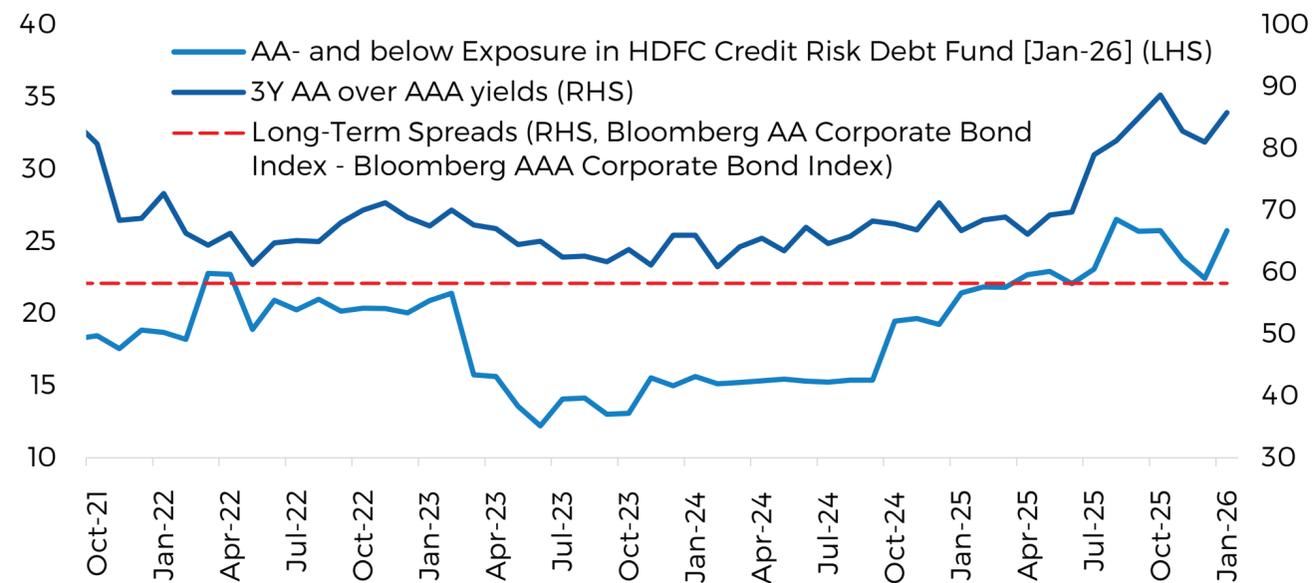

Credit Spreads remain elevated

Credit Spreads remain attractive and above long-term average

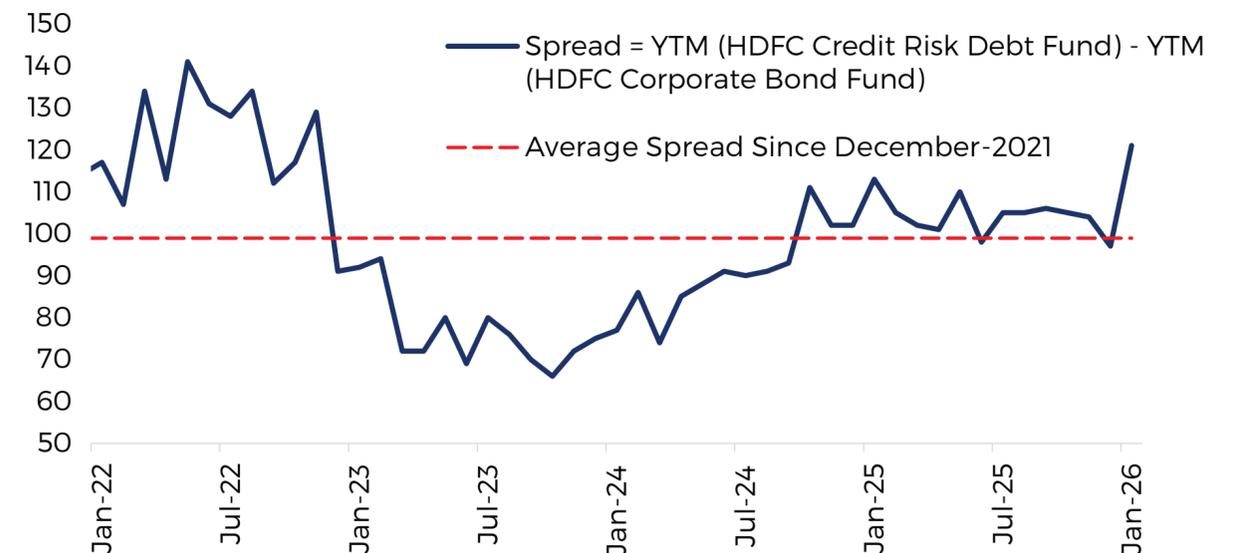

Exposure to AA- and below ratings in HDFC Credit Risk Debt Fund are dynamically calibrated in line with credit spreads

YTM differential between HDFC Credit Risk Debt Fund and HDFC Corporate Bond Fund also remains above average since December 2021

AA spreads remain attractive & Rating profile calibrated inline spreads

YTM Spread of HDFC Credit Risk Debt Fund vs HDFC Corporate Bond Fund

Source: Bloomberg for Yield Spreads, MFI Explorer for Portfolio Composition

- Global growth continues to hold up well led by the US
- However, uncertainty remains high amidst geopolitical realignments and risk of flare ups
- Growth in India has held up well on the back of fiscal (income tax and GST cuts) and monetary (lowering of interest rates) stimulus

- High frequency indicators have steadily improved over the last few months with rural demand continuing to hold up well and urban demand too showing signs of uptick
- Trade deals, especially those with the EU and US, will also potentially support growth going forward

- Inflation remains well anchored and though it's expected to rise from here on due to base effect, it's likely to remain close to RBI's target of 4%
- Government to remain committed to the fiscal consolidation path with the aim of bringing down Debt/GDP to 50% (+/-1%) by FY31

RBI's decision to keep the policy rate and stance unchanged in its latest Monetary Policy Review was on expected lines, but will be dependent on data hereon

Outlook

Shorter End: Yields on the shorter end are likely to have a downward bias as RBI ensures sufficient liquidity, inflation remains close to target and Government expenditure at the end of the fiscal year augments liquidity

Longer End: Yields on the longer end is likely to remain under pressure due to large supply and muted demand from long term players

Source: Reserve Bank of India (RBI). The statements contained herein are based on our views in Monetary Policy Review for February 2025 and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements.

Parameters	Current	Outlook	Supportive of Yields falling
Growth	Real Gross Domestic Product growth has held up well in India	Growth likely to moderate in H2FY26, but could stabilize in FY27, if the trade related uncertainty reduce	↔
Inflation	Trending lower led by food inflation and Goods and Services Tax cuts	CPI likely to rise in H1FY27 but will remain contained and close to target	👍
External Sector	Goods trade deficit has risen lately, but services exports remain healthy	CAD** likely to remain contained. India REER* has fallen much below long-term average. Trade deal with US likely to revive sentiments	↔
Liquidity	Liquidity in comfortable position due to RBI actions	RBI likely to provide ample liquidity in FY27 as well	👍
Fiscal Situation / Market Borrowings	Some concerns on fiscal slippage this year due to sluggish tax collections but Govt likely to meet Budget targets	Government likely to stick to the fiscal consolidation path in FY27 as well	👍
Monetary Policy	RBI has cut policy rate by 125 bps and infused sufficient liquidity	RBI has indicated that it will be data dependent from hereon and has projected CPI inflation of ~4% in H1FY27	👍
Credit Environment	Credit market have remained benign for last 4 years	Strong corporate and bank balance sheet provides comfort going forward	👍

With current rate cutting cycle close to its end, investor could explore accrual products

*REER: Real Effective Exchange Rate

**CAD: Current Account Deficit

How does an Arbitrage Fund function?

Index / Stock Spot

Index / Stock Futures
and multiple others

Arbitrage Funds seek to generate income through
arbitrage opportunities between such markets

What leads to a widening of
arbitrage spreads?

Volatile and sustained bull
markets lead futures to
be priced higher than cash

This offers potential for arbitrage
funds to generate returns

As Arbitrage Fund takes no directional bets, Equity portion of an Arbitrage Fund is 100% hedged

Risk	Mitigants
Risks / Mitigants pertaining to Arbitrage Funds	
<p>There may be instances where the price spread between cash and derivative market is insufficient to meet the cost of carry, which might cause the Fund Manager for Arbitrage Fund to not be able to outperform liquid / money market funds due to lack of opportunities in the derivative market</p>	<p>Arbitrage Fund provides for allocating upto 100% of assets in debt and money market securities for generating regular income. Investments in debt / money market securities would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk</p>
Risks / Mitigants pertaining to Debt Mutual Fund Schemes	
<p>Changes in the general level of interest rates can affect the Net Asset Value (NAV) of the Scheme to the extent invested in Debt Schemes. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates</p>	<p>Debt Schemes of HDFC Mutual Fund seek to manage the duration of debt assets on a proactive basis to manage interest rate risks and to optimise returns</p>
<p>Investing in various debt instruments are subject to varying degree of credit risk or default or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values</p>	<p>A credit evaluation of each debt instrument would be undertaken. This would also consider the credit ratings given to the instrument by recognized rating agencies</p>
<p>SO* rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE** securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold</p>	<p>Some of the strategies to reduce liquidity risk are creating portfolios that are diversified across maturities, ratings, types of securities, etc. in line with the underlying debt fund objectives, regulations and investment strategy</p>

*SO: Structured Obligation, **CE: Credit Enhancement. For additional information on the risks involved, please refer to the SID of the Underlying Schemes of the FOF at www.hdfcfund.com once the portfolio is constructed
